

Clark+Elbing LLP is a Boston-based IP law firm representing clients at the forefront of scientific discovery and technological innovation.

From universities, medical centers and companies of all sizes to the investors who back them, we represent leaders in their respective fields. Our practice encompasses intellectual property (IP) in the areas of biotechnology, pharmaceuticals, chemistry, devices and diagnostics.

An Ideal Path for Ph.D. Scientists

Our firm is comprised of IP attorneys with advanced degrees in science. We are always looking for outstanding scientists, patent attorneys and law students to join our growing team.

Scientists start as technology specialists and work closely with the legal staff to develop the skills required to be a patent attorney. Working at Clark+Elbing means you will enjoy:

- On-the-job training alongside acclaimed patent attorneys
- Support and encouragement throughout law school
- Full tuition reimbursement for approved technology specialists attending law school
- Assistance with patent bar exam preparation
- Partner-level attention and guidance
- Direct client interaction
- Onsite seminars and other professional development opportunities
- Opportunities for on-site, remote and hybrid work environments

An environment where you can thrive

We are unapologetic science enthusiasts with a deep appreciation for technology. We bring this focus and passion to everything we do. Although our professionals work hard, we have a collegial, non-competitive work environment in which everyone honors the need to balance work and non-work life. Our style is collaborative, with three or four staff often contributing to a single project. We hire only people who thrive under these conditions.

Do you have what it takes?

All applicants must possess excellent analytical and communications skills – the ability to think, write and speak clearly. Law students and patent attorneys must have at least an undergraduate science degree. Technology specialists must hold a Ph.D. or equivalent degree in the sciences.

If you are interested in applying for a legal position at Clark+Elbing, please send an email to legalcareers@clarkelbing.com. Please include a cover letter, résumé and a recent writing sample.
